

MANAGEMENT SCHOLARS ACADEMY

Your mentor on the management ladder

Attend our workshops to acquire project management leadership

MS Academy is founded with a vision

To instill the '**nuances in the art of management**' and the '**formulas in the science of management**' in project leads and thus develop outstanding managerial talent that helps Indian corporate excel in the global market.

Our strategy

To make this vision a reality, MS Academy offers workshop to build Project Management Leadership skills that will enable project leads / project managers

- to manage the projects professionally using practitioner certified project management tools and techniques
- to handle clients, team members, senior management, shareholders and society with confidence

We will bring out the star managers dormant in your expert engineers and smart programmers.

As part of the strategy, we also provide additional help through mentoring, blogs, seminars, newsletters, consulting assignments and so on in addition to training solutions.

Faculty

MS Academy is the dream project of a set of successful IT professionals. From the strength gained through premier education, rich project and program management experience, wide international exposure, we are keen to train and motivate the next generation managers to perform at a higher level. The other major strength of MS Academy is the network of visiting faculty who are part of management team in multinational companies. They are willing to make time to share their knowledge and first hand experience of PM best practices with you.

Who should attend?

The workshop is targeted at project leads with 5-10 years of professional experience, who handle critical projects.

But the only prerequisite for participating in this program is the aspiration to excel, and not just succeed, in the world of management, by employing logical and analytical tools that are provided in the workshop.
